Chapter 1

Laying Out Your 5.5" x 8.5" Book

Set your page size to the size of the printed book you have chosen. In order to prevent text from being cut off during the final production of your book, make sure that you set your page margins at no less than three quarters of an inch (.75") from the trim line. All text, including running headers and page numbers should be at least .75" from the trim edge of the book.

These pages illustrate the good margins for a 5.5" x 8.5" book. The font is Adobe Caslon. It is set at 11 points with 13.5 points of leading and left justified text.

The text follows on this display page is written in Lorem Ipsum. Lorem Ipsum is an "invented language" used by typesetters and designers to represent text that has not yet been written, or provided. It is used as a placeholder to indicate that this is where the type/text will go. It is also used to display a particular size or style of type that is under consideration by the designer and/or client.
